

PRIMEX UB 40

Description

Aliphatic polyurethane in water dispersion

Specifications

<i>Appearance</i>	<i>Whitish emulsion</i>
<i>Total solids (%)</i>	<i>36 - 39</i>
<i>pH</i>	<i>8,0 - 10,0</i>
<i>Charge</i>	<i>Anionic</i>

Employment Field

PRIMEX UB 40 F is a polyurethane in aqueous dispersion, designed for finishing various types of leathers, both split and full grain, to give them particular characteristics of adhesion, printability and resistance to wet rub and flexion. It is used with great advantage in formulations for covering buffed leathers for car upholstery and footwear, giving excellent resistance to cold cracking and excellent surface smoothness and closure.
